INSTALLATION GUIDE

CEILING LAMP »STELLA«

IMPORTANT INFORMATION

This manual describes the correct installation of the device. Please follow all steps properly and observe warnings and notes!

OPERATING INSTRUCTIONS FOR THE OZONOS® AC-I

CAN BE FOUND AT:

WWW.OZONOS.COM/ANLEITUNG

OR SIMPLY SCAN QR-CODE:

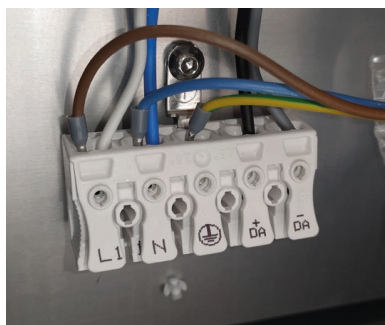

STEP 1

Before working on electrical installations and systems, please make yourself familiar with the basic principles and safety measures. Switch off the fuse.

STEP 2

Remove the mounting brackets from the two parts of the ceiling lamp. Attach the brackets to the ceiling as one piece by using the fitting screws and dowels.

STEP 3

Have the wiring of the ceiling lamp carried out by an electrician. Instructions can be taken from the enclosed „Basic DIM Wireless LED Driver“ booklet.

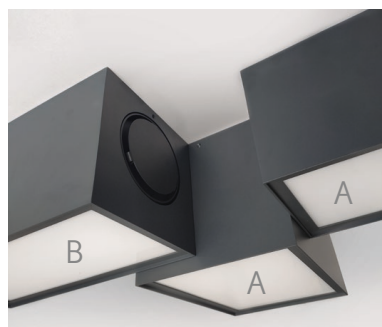

STEP 4

Fasten part A of the ceiling light to the mounting bracket with the matching screws.

STEP 5

Connect the two black cables of part A and B.

STEP 6

Fasten part B of the ceiling light to the mounting bracket with the remaining screws.

CHANGING THE UV-C BULB

The UV-C lamp inside the OZONOS Aircleaner lasts 8,000 operating hours and should then be replaced. Remove the screws from the mounting bracket, disconnect the two black cables and take part B off the ceiling. Loosen the four screw nuts on the metal cover and lift the OZONOS out of the housing. All further steps for changing the UV-C lamp can be found at: www.ozonos.com/anleitung.
